<b>Gander</b> gravesite								
The aircraft hull sink exists and the gravesite next to it is protected. It took three days to get the survivors out yet was only 20 miles from Gander, they flew a helicopter from New York (Bell?) to Gander inside a landed on Caribou Lake a few miles from the site, the heli then shuttled to and from the lake. The story does allude to the possibility of diamonds on board as there were merchants as passengers.								2004
