<b>Budingen</b> US Helicopter Base lata / Icao code						
take highway A66 Frankfurt-Fulda (or the other way around). Take exit "Grundau-Lieblos". then follow signs "Budingen". When passing the townborder. almost immediately turn left (direction "Orleshausen") and then immediately right again (still "Orleshausen"). For a few meters you'll be driving parallel to the road on which you entered town. On the left you'll see the army-barracks and after a few km on the right you'll see the airfield. Take the country-road to drive parallel to the heli-ramp. This is the best place to read-off serials! It is also possible to view from the other side: Back to when you entered the town..... follow the road through town. At the crossing of 3 roads stay left and follow this across a railway until you get on the roundabout. Follow the roundabout and take the 2nd right (follow signs to highway). Follow this road and you'll see the airfield There is a parking-spot with a picknicksite which is very convenient. The distance may be a bit long to read off serials though. Don't try to walk through the fields as the farms Not appreciate this and is known to call the police.

<b>Dessau</b> Förderverein Technikmuseum Hugo Junkers								
the museum at Dessau is on the western side of town. I seem to remember (from a visit 2 years ago). The primary aim of the museum is to exhibit a Ju52 - after all. It is the 'Hugo Junkers Museum'. I seem to remember that everything is outside "except" the Ju52 and a Yak 27. There is a lot of space inside the museum building so it is possible that they might move some of the external exhibits inside.

Het veld is in tweeën gesplitst door een openbare, doorgaande, weg.  
 Ten noorden van die weg zijn de productiehallen en de runway en staan kisten die uit de productiehallen komen (vaak in primer, maar ook wel gespoten exemplaren). Vanaf een dijk, parallel met de runway, heb je prima zicht op runway en de platforms voor de productiehallen. ( Je kunt hier ook de rompdelen voor de A330/A340's zien die klaarstaan voor transport naar Toulouse, en met wat mazzel pak je ook een Beluga mee).  
 De kisten worden over de openbare weg van het ene naar het andere deel gesleept. Ten zuiden van de doorgaande weg zie je de kisten staan die (bijna) klaar zijn voor aflevering Al met al kun je een stuk of 10 kisten spotten (met pech maar ca. 6 en met geluk een paar meer).  
 Ik fotografeer niet, maar denk dat je op de runway (als er iets vliegt) perfect kunt platen, want je staat met je neus bovenop de runway met de zon in je rug, de kisten op het afleverplatform zullen wat lastiger te platen zijn, qua licht. Doordeeweeks is er meestal wel wat te platen en goed ook. XFW heeft 1 baan envlak daar langs parallel loopt een dijk XFW ligt eigenlijk buitendijks aan de rivier). Op die dijk staand kun je de vliegtuigen welke op de baan zitten met weinig mm platen.  
 Zoals gezegd is er door de week vaak sprake van testruns en vluchten als ook de Beluga's, maar met die laatste moet je ook maar mazzel hebben.

Aan de landzijde van de dijk heb je ook een platform met soort van Terminal, waar ook afgebouwd wordt, ook hier valt wel wat te platen maar meestal wel met wat "bagger" erom heen. Kortom XFW is vaak een kwestie van geluk hebben...je zult maar net tegen een Frontier A319 aanlopen....

Via onderstaande link kan je een rondleiding aanvragen bij de Airbus fabriek in Hamburg:

HEUBERG range		Truppenübungsplatz							
the "Heuberg" area is a great location for taking pictures... The choppers are very low and the light conditions are still great over the days. The Heuberg area can be reached without permission. the fighters are a little bit difficult to photograph. But with a 400mm lens no problem.

<b>Koblentz</b> Wehrtechnische Studiensammlung									
Info:	Its on the on the eastern bank of the Mosel off the B258 which is a left turn off the B9 which crosses the river on the Europabrucke. Be aware that last entry is about 30 minutes before closing time and that nothing is visible from outside. It's quite simple. You take highway exit 10 in town (from the north), this is Bundesstrasse 9. Just before you reach the bridge over de river Rhein. the museum is at the right. I recall it is sign posted. but the signs were not really big.								
GPS					KML Location	50,36778	7,58556	Museum-Loblentz	2007
<b>Koeln-Bonn</b> lata / Icao code CN EDDK									
Info:	De UPS kisten heb ik gelezen vanaf het militair oefenterrein (727's) en vanaf Cargo (767's en A300's). Je komt bij het militair oefenterrein als volgt: Je rijdt het vliegveld af (snelweg) en neemt de eerste afslag. Bij de stoplichten ga je rechtdoor. Bij de volgende stoplichten ga je rechts af. en bij de stoplichten daarna wer rec De weg waar je nu op rijdt blijf je alsmat volgen (immer gerade aus. zeg maar). Na een paar kilometer zie je dan vanzelf de 727's staan. aan de rechter kant. Wij hebben de auto voor 2 minuten bij een brandveeruitgang neergezet. We hebben geen politie gezien. maar het is best mogelijk dat ze streng controleren. Wellicht veel gel Om de 767's en de A300's te zien van af Cargo: Als je het vliegveld op rijdt zie je aan de linker kant borden voor Cargo. Die volg je. Je komt dan bij een bewaker en een slagboom. Vertel in je beste Duits aan de bewaker dat je naar UPS moet. Hij vroeg ons een "Ausweis". en of we wisten waar het was. Wij wisten dat niet. maar de beste man was zo vriendelijk om het ons uit te leggen!!! "Immer gerade aus. ook bij de rotondes. en het is het laatste gebouw aan de linker kant." De vliegtuigen rotonden rechts. met een aantal WDL F-27's er bij.								
Info:	G-91 3129 is at the gate near to the approach to the civil terminal. backtrack from the terminal on the minor road towards Gregel. the gate is on Kriegerstrasse which is off Waldstrasse. The only other a/c we could see was the F-104F BB-374. really 2911. which can be found by back tracking and going down Gregelers Mauspfad and keeping to the fence on your left hand side. The a/c can be seen thru the trees between some buildings. on the left. <a href="http://www.cgn-forum.de/">http://www.cgn-forum.de/</a> <a href="http://www.cgn.de">www.cgn.de</a> <a href="http://www.spottercgn.de/newguide/html/cgn.html">http://www.spottercgn.de/newguide/html/cgn.html</a>

<b>Laage</b>		Airbase				lata / Icao code		

The airport is about 30 km south of Rostok just east of the Rostok/Berlin motorway. The Laage exit is a little south of the runways. The best spot for photography is a local road which curves around the east side of the field towards Kronskamp. and passes under the 28 approach. When I was there. they were using 28 in the morning. I drove up into a hayfield and got some nice pictures of landing MiGs and Phantoms.

At the southeast corner of the field is a civilian terminal with freeparking and with a view of runways and taxiways. In the afternoon theyswitched to 10 and I was able to get some pics of planes taking off fromthis terminal. though you really need 500-600 mm from this spot for singletons.

The west side of the base is right against the motorway and is screened bytrees. In fact there seems to be a taxiway which extends out (through afence) to the motorway itself. There is a local dirt/grass road which parallels the motorway (east of it) and which extends from the south up to the airfield boundary. but there is no view of taxiways from it.

It is a waste of time to try to go to the west side of the motorway in a try to get under the approach to 10 (at least that was my experience). There isa dirt road from the north that Passes between the motorway and a small lake; it ends in a ploughed field and you are still too far north. plus everything is backlit. I could find no sight of the field trying to approach from the north side.

<b>Ramstein</b> USAF Air force Base lata / Icao code RMS ETAR									

From the runway 09 side you have to drive back to Landstuhl. In that place you have to ride straight ahead to the place Kindsbach. In this place you see at your left and side a restaurant called "Restaurant Da Toni". opposite this restaurant you have to take the Steichstrasse to the right. This way goes upstairs and at the end of this way, you have to parked your car. From that point you have to walk to the right and take the path to the right. As you follows this path you find a bench at your left and side. From this point you can see most of the airplanes Who has parked there airplanes at Ramstein.

In het dorpje Binsfeld ga je bij het kruispunt met de Ford garage/dealer. de weg in welke richting basis (en school. sport club en visvijver) loopt. vlak na de visvijver ga je recht De weg gaat schuin om hoog de heuvel op. Na enkele meters gaat er een pad (zandweg) links omhoog richting het hek. Deze neem je. Je komt nu uit naast een autosloperij welke binnen het basishek ligt. Je kunt hier komen met je auto. maar je staat er in het zicht van de verkeerstoren. Verstandiger is misschien om bij de sportclub of de visvi te parkeren en het hele stuk te voet omhoog te lopen. Ook je camera zou ik niet te veel te opzichtig dragen om problemen te voorkomen. De ene keer heb je er namelijk geen op een ander moment heb je vrij gauw problemen met alleen al kijken met een telescoop. laat staan een camera dus. Vanaf deze plek is er met 300-400mm te fotograferen op de baan. Inderdaad met de basis (en heuveltjes) op de achtergrond (typische Spangdahlem foto's). Voor je loop nog een taxibaan. heel zelden word deze wel eens gebrt. En dan voornamelijk door A-10's. Ik heb er ook een maal een AC-130 gehad die daar voor ons neus geparkeerd werd. Voor je neus is de toren. met daar onder (in de glooiing van de basis) het visitors platform. Dit is echter niet zichtbaar om dat het lager ligt dan de andere delen van de basis. lets naar links is het shelterkamp van de A uiterst links worden meestal de AMC kisten geparkeerd welke het veld zo af en toe bezoeken. Aan de andere kant en ook halverwege de baan bevinden de twee kampen van 22e en 23e FS met hun F-16's. De oostelijke baankop is ook te bereiken. hier kan je redelijk in de landing fotograferen. Grote kisten dit hier de baan opdraaien of omkeren zij ook te pakken. Maar vertrekkende fighters. Welke de baan op taxieen. zijn hier zelfs met 400mm erg klein op de foto. Welke kan je mogelijk een enkele F-16 redelijk leuk vas op foto als er een buiten staat voor een van de shelters dicht bij het hek. Voor deze plek rijd je vanuit Binsfeld links om de basis (richting hoofdpoot met 5(!!) gate guards). in het dorpje na de hoofdpoot ga je rechts en volg je het hek zo dicht mogelijk over een steeds slechter wordende betonplaatweg. Op het kruispunt in het bos ga je naar rech' (je volgt het hek aan je rechterhand gewoon). voor de slagboon parkeer je de auto. Vanaf hier loop je naar de landing (en staat je auto redelijk uit het zicht van de bewaking). Dit is nog wel even een stukje lopen. Maar het is een ander plekje dan de (alom bekende?) plek in Binsfeld welke ik hierboven als eerste beschreef.
