Ons reisburo heette Rusadventure en onze reisleidster wist alles van vliegveldbezoeken van spotters. Haar naam was OLga. ze weet van wanten.misschien hebben ze n website

je kan het natuurlijk ook proberen te regelen via OSDU op het Scramble messageboard. Met een beetje mazzel brengt hij je ook nog naar de beste spottersplekken. Hij heeft mij ook geholpen op SVO en wilde Moskou (civiel en militair). De uitnodigingsbrief kan Het Visumburo (www.visumburo.nl) ook voor je regelen

www.visum.nl <<http://www.visum.nl/>> : hier moet je zijn om op de makkelijkste manier aan je visum voor Rusland te komen !!

Het restaurant op SVO 2 is open, maar kleiner (4 a 5 tafeltjes bij het raam).

Uitzicht prima.

Je kunt met bus 817 naar SVO1 komen en de IL18 fotograferen.

Er is een halte net na het passeren van de finals van de 2 banen en als je terug loopt kun je in de landing fotograferen.

Het stond er vol met auto's en mensen. Tu134 aeroflot nord in de landing gepakt.

Als je terug wilt moet je bus 851 nemen.

kaartjes 20 roebel bij de sjofeur.

tip van de local was om als je uitgestapt bent een pad van het vliegveld af te nemen eerste bospad rechts. Dan passeer je een huisje aan je rechterhand.

Loop als maar door tot aan de spoorbaan. Heb al wel gezien dat er ook mensen zijn die de spoorbaan over staken om aan de andere kant te staan (sta je wat je beter)

Ivanovo		Airfield		lata / Icao code			
----------------	--	----------	--	------------------	--	--	--

Ivanovo is on the main route out of Ivanovo towards Kostroma. The road actually bends round the base. On first approaching the field you meet the maintenance hangars around which were, in 96, 4 or 5 An-22s. Many A and some 72s. Most were easy to read off though where you had groups of aircraft it was difficult to get angles for all of them. There was no security obvious and the locals used a gap in the perimeter wall to walk their cars. We followed suit with much nervousness and 'ambled' casually amongst the An-22s.

Further up the road and the airfield proper comes into view with around 10 or 12 An-22s on a flight line with a half dozen -76s and similar number of 62s dotted around other disposals. All were readable with a little effort. My Russian driver was nervous about stopping for too long and I would suggest that you shouldn't spend more time than is necessary else you are likely to raise suspicions.

If you carry on to Kostroma there is a small civil airport with An-2s, Let-410s and a training unit of Hinds (mil obviously). The airport operations people were happy to escort us onto the apron for photographs.

There is also a small airport South of Ivanovo where Tu-134s and An-24s are based. Again, no problem with photos here.
